<u>AIM</u>:- Implementation of at least five different SQL nested sub queries in select clause on each Banking-University and DB Project assigned.

**STEP 1:** Implementation of at least five different SQL nested sub queries on banking data

# **Query 1:-**

```
SELECT

account_number,

branch_name,

balance,

(SELECT COUNT(*)

FROM depositor

WHERE depositor.account_number = account.account_number) AS depositor_count

FROM

account;
```

This query retrieves the account number and the count of depositors for each account.

| account_number | branch_name | balance | depositor_count |
|----------------|-------------|---------|-----------------|
| A-101          | Downtown    | 500     | 1               |
| A-102          | Perryridge  | 400     | 1               |
| A-201          | Brighton    | 900     | 1               |
| A-215          | Mianus      | 700     | 1               |
| A-217          | Brighton    | 750     | 1               |
| A-222          | Redwood     | 700     | 1               |
| A-305          | Round Hill  | 350     | 1               |

### **Query 2:-**

```
SELECT
customer_name,
loan_number,
(SELECT amount
FROM loan
WHERE loan.loan_number = borrower.loan_number) AS loan_amount
FROM
borrower;
```

This query retrieves each borrower's name and the amount of their loan.

| DOA :- 20/09/2024 | PRACTICAL - 8 | DOS :- / /2024 |
|-------------------|---------------|----------------|
|                   |               |                |

| customer_name | loan_number | loan_amount |
|---------------|-------------|-------------|
| Smith         | L-11        | 900         |
| Jackson       | L-14        | 1500        |
| Hayes         | L-15        | 1500        |
| Adams         | L-16        | 1300        |
| Williams      | L-17        | 1000        |
| Smith         | L-23        | 2000        |
| Curry         | L-93        | 500         |

# **Query 3:-**

SELECT

branch\_name,
(SELECT SUM(amount)

FROM loan

WHERE loan.branch\_name = branch.branch\_name) AS total\_loans

FROM

branch;

This query retrieves each branch's name and the total amount of loans issued from that branch.

| branch_name | total_loans |
|-------------|-------------|
| Brighton    | NULL        |
| Downtown    | 2500        |
| Mianus      | 500         |
| North Town  | NULL        |
| Perryridge  | 2800        |
| Pownal      | NULL        |
| Redwood     | 2000        |
| Round Hill  | 900         |
|             |             |

# **Query 4:-**

**SELECT** 

branch name,

(SELECT COUNT(\*)

FROM account

WHERE account.branch name = branch.branch name) AS total accounts

**FROM** 

branch;

This query retrieves each branch's name along with the total number of accounts associated with that branch

| branch_name | total_accounts |
|-------------|----------------|
| Brighton    | 2              |
| Downtown    | 1              |
| Mianus      | 1              |
| North Town  | 0              |
| Perryridge  | 1              |
| Pownal      | 0              |
| Redwood     | 1              |
| Round Hill  | 1              |

## **Query 5:-**

**SELECT** 

branch\_name,

(SELECT AVG(balance)

FROM account

WHERE account.branch name = branch.branch name) AS average balance

**FROM** 

branch;

This query retrieves each branch's name along with the average balance of accounts associated with that branch.

| branch_name | average_balance |
|-------------|-----------------|
| Brighton    | 825.0000        |
| Downtown    | 500.0000        |
| Mianus      | 700.0000        |
| North Town  | NULL            |
| Perryridge  | 400.0000        |
| Pownal      | NULL            |
| Redwood     | 700.0000        |
| Round Hill  | 350.0000        |

STEP 2:- Implementation of at least five different SQL nested sub queries on University data

# **Query 1:-**

```
SELECT
dept_name,
(SELECT COUNT(*)
FROM course
WHERE course.dept_name = department.dept_name) AS course_count
FROM
department;
```

This query retrieves each department's name and the count of courses offered in that department.

| dept_name  | course_count |
|------------|--------------|
| Biology    | 3            |
| Comp. Sci. | 5            |
| Elec. Eng. | 1            |
| Finance    | 1            |
| History    | 1            |
| Music      | 1            |
| Physics    | 1            |

# Query 2:-

SELECT
name,
salary,
(SELECT budget
FROM department
WHERE department.dept\_name = instructor.dept\_name) AS dept\_budget
FROM
instructor;

This query retrieves each instructor's name, salary, and the budget of their department.

| name                | salary    | dept_budget |
|---------------------|-----------|-------------|
| Dr Dheerendra Singh | 154239.96 | NULL        |
| vicky               | 163909.05 | NULL        |
| Srinivasan          | 75245.63  | NULL        |
| taran               | 163909.05 | 80000.00    |
| Wu                  | 104186.25 | 120000.00   |
| Mozart              | 46305.00  | 80000.00    |
| Mozart              | 46305.00  | 80000.00    |
| Wu                  | 138910.50 | NULL        |
| Einstein            | 107879.63 | 70000,00    |
| El Said             | 69457.50  | 50000.00    |
| Gold                | 100713.38 | 70000.00    |
| Katz                | 86821.88  | NULL        |
| Califieri           | 71772.75  | 50000.00    |
| Singh               | 92610.00  | 120000.00   |
| Crick               | 83349.00  | 90000,00    |
| Brandt              | 104472.90 | NULL        |
| Kim                 | 92610.00  | 85000.00    |

# Query 3:-

```
SELECT
building,
(SELECT SUM(capacity)
FROM classroom c
WHERE c.building = classroom.building) AS total_capacity
FROM
classroom
GROUP BY
building;
```

This query retrieves each building's name and the total capacity of classrooms within that building.

| building | total_capacity |
|----------|----------------|
| Packard  | 500            |
| Painter  | 10             |
| Taylor   | 70             |
| Watson   | 80             |

# **Query 4:-**

**SELECT** 

dept name,

(SELECT AVG(credits)

FROM course

WHERE course.dept name = department.dept name) AS average credits

**FROM** 

department;

This query retrieves each department's name and the average credits for courses offered in that department.

| dept_name  | average_credits |
|------------|-----------------|
| Biology    | 3.6667          |
| Comp. Sci. | 3.4000          |
| Elec. Eng. | 3.0000          |
| Finance    | 3.0000          |
| History    | 3.0000          |
| Music      | 3.0000          |
| Physics    | 4.0000          |

# **Query 5:-**

```
SELECT
```

dept name,

(SELECT AVG(salary)

FROM instructor

WHERE instructor.dept name = department.dept name) AS average salary

**FROM** 

department;

This query retrieves each department's name and the average salary of instructors in that department.

| dept_name  | average_salary              |
|------------|-----------------------------|
| Biology    | 83349.000000                |
| Comp. Sci. | NULL                        |
| Elec. Eng. | 92610.000000                |
| Finance    | 98398. <mark>1</mark> 25000 |
| History    | 70615.125000                |
| Music      | 85506.350000                |
| Physics    | 104296.505000               |

<u>STEP 3:-</u> Implementation of at least five different SQL nested sub queries on Computational data of all Staff (Project no :- 7)

### Schema :-

- details\_teaching\_official(<u>NAME</u>, DESIGNATION, DEPARTMENT, DESIGNATION-ID, DEPARTMENT-ID, ROOM\_NO., JOINING\_DATE, EXPERIENCE\_MONTHS, ASSOCIATION TYPE)
- ❖ detail teaching personal (NAME, AGE, GENDER, PHONE NUMBER, QUALIFICATION, E-MAIL)
- ❖ details non teaching (NAME, GENDER, EMAIL ID, DESIGNATION-ID, DEPARTMENT-ID)

# Query 1:-

```
SELECT
```

DEPARTMENT,

(SELECT COUNT(\*)

FROM details teaching official t

WHERE t.DEPARTMENT = details teaching official.DEPARTMENT) AS staff count

### **FROM**

details teaching official

**GROUP BY** 

DEPARTMENT;

| DOA :- 20/09/2024 | PRACTICAL - 8 | DOS :- / /2024 |
|-------------------|---------------|----------------|
|-------------------|---------------|----------------|

# Count of Teaching Staff in Each Department

| DEPARTMENT                           | staff_count |
|--------------------------------------|-------------|
| Applied Science                      | 4           |
| Civil Engg.                          | 7           |
